HIKVISION®

01 Low-light Imaging Challenges

Supplemental lighting enables security cameras to "see" clearly in dim environments. Conventional cameras with infrared (IR) light provide black & white images which usually result in loss of details. While white-light cameras offer colorful images, when the light is always on, it is easy to notice and might be disturbing in some specific scenarios.

03 How Smart Hybrid Light Cameras Work

Hikvision's Smart Hybrid Light Cameras provide three supplemental lighting modes: IR mode, white light mode, and smart mode, suiting virtually any need or application.

IR Mode

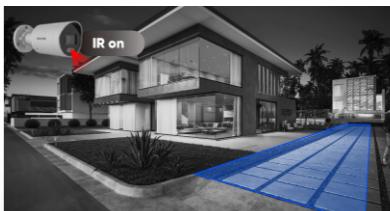

The IR light is always on, and video imaging remains black and white (in low light).

When there is no vehicle or person, the camera uses only the IR light, offering black and white imaging.

When a vehicle or person appears, the white light is automatically triggered, resulting in vivid color imaging with clear details.

When the vehicle or person leaves, the camera switches back to the IR light, rendering black and white imaging.

White Light Mode

The visible white light is always on, and the camera captures color imaging 24/7.

Smart Mode

In this mode, the camera uses invisible IR light when there are no people or vehicles around. When a person or vehicle appears, the camera automatically triggers the white light, providing vivid color images with detailed information. This ensures overall security and flexibility for users.

04 Product Performance

Supplemental light off

Conventional camera

Smart hybrid light camera

Richer colors and better color effect in low light conditions

IR on

Conventional camera

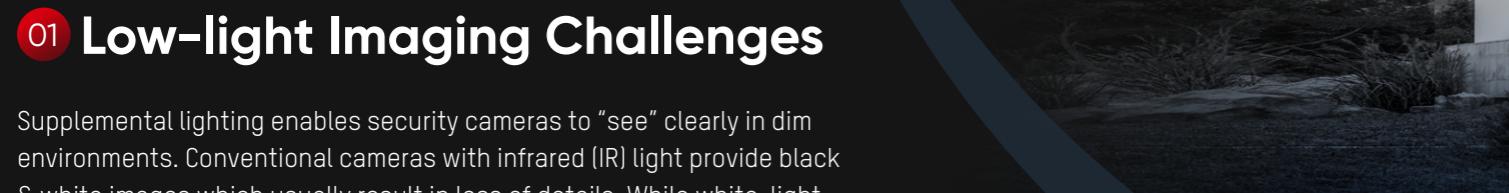

Smart hybrid light camera

Overall image brightness is better than traditional cameras

White light on

Smart hybrid light camera

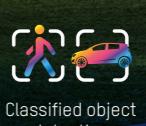

02 Meet Smart Hybrid Light Cameras

To solve these pain points, Hikvision has created a new approach to supplemental lighting technology – the Smart Hybrid Light. Security cameras with Smart Hybrid Light allow users to adjust the supplemental lighting based on specific needs and environments.

Flexible hybrid-light illumination

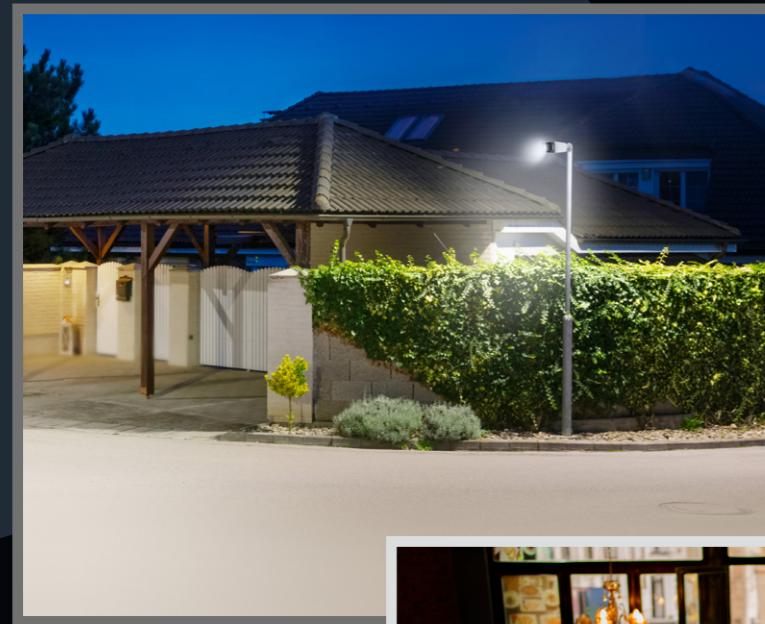

Classified object detection

Trespassers deterred with lighting

05 Typical Scenarios

1 Residences

Residences

Used as a motion sensor to light the way for family members at night

Deter would-be trespassers to keep residence safe and secure

2 Warehouses / Retail Stores

Classified object detection of people and vehicles using Motion Detection 2.0

Deter potential trespassers when the store or warehouse is closed

3 City Streets

Brilliant and vivid imaging even in dim environments without supplemental lighting

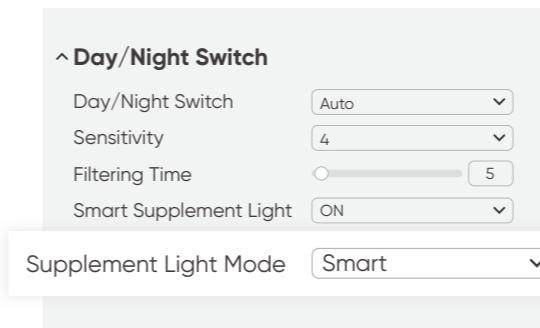

No unwanted or excessive light pollution

06 Easy Configuration

It only takes a few simple steps to set up the Smart Hybrid Light on the cameras.

• Network cameras

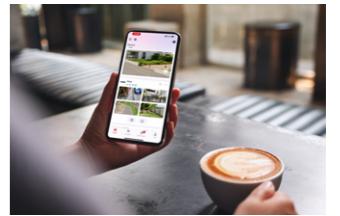

Users can choose from three supplemental lighting modes simply by one click or a few taps.

*The Motion Detection 2.0 or Perimeter Protection function shall be enabled manually.

Web

Mobile app

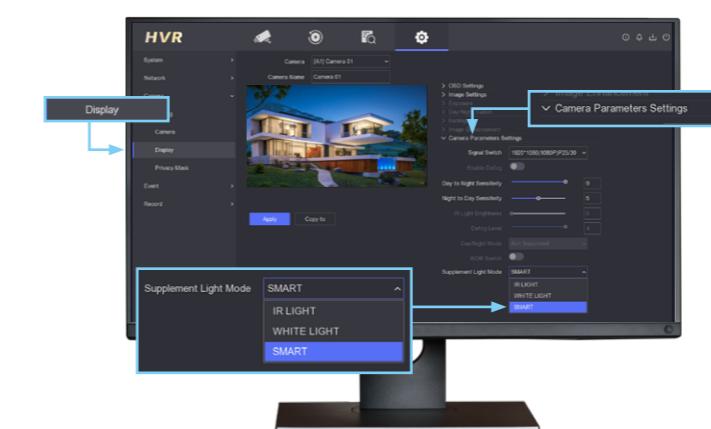

NVR

• Turbo HD cameras

Users can easily switch among three supplemental lighting modes by using a recommended DVR.

The camera is set to smart mode by default, eliminating manual setup.

Available firmware

Product Series	Firmware Version
eDVR series	V4.71.220
Value series	V4.71.400
Pro series with AcuSense	V4.71.100

Product Showcase

Turbo HD Smart Hybrid Light Cameras

DS-2CE16DOT-LFS

2 MP Mini Bullet Camera

- 0.01 lux @ F1.6
- 2.8/3.6 mm lens
- Smart Hybrid Light
- Up to 20 m white light distance and 30 m IR distance
- Digital WDR
- Audio over Coaxial cable
- IP67
- Metal

DS-2CE16DOT-LPFS

2 MP Mini Bullet Camera

- 0.01 lux @ F1.6
- 2.8/3.6 mm lens
- Smart Hybrid Light
- Up to 20 m white light distance and 25 m IR distance
- Digital WDR
- Audio over Coaxial cable
- IP67
- Plastic

DS-2CE17DOT-LFS

2 MP Bullet Camera

- 0.01 lux @ F1.6
- 2.8/3.6 mm lens
- Smart Hybrid Light
- Up to 40 m white light distance and 40 m IR distance
- Digital WDR
- Audio over Coaxial cable
- IP67
- Plastic & Metal

DS-2CE16KOT-LFS

3K Mini Bullet Camera

- 0.01 lux @ F1.6
- 2.8/3.6 mm lens
- Smart Hybrid Light
- Up to 20 m white light distance and 30 m IR distance
- Digital WDR
- Audio over Coaxial cable
- IP67
- Metal

DS-2CE16KOT-LPFS

DVRs with Motion Detection 2.0 / AcuSense

DS-7204HGHI-M1

4 Channel DVR with Motion Detection 2.0

- Deep learning based Motion Detection 2.0 on all 4 channels
- 1080p lite @ 15 fps
- Maximum 5 IP camera inputs (up to 2 MP)

DS-7208HGHI-M1

8 Channel DVR with Motion Detection 2.0

- Deep learning based Motion Detection 2.0 on all 8 channels
- 1080p lite @ 15 fps
- Maximum 10 IP camera inputs (up to 5 MP)

DS-7216HGHI-M1

16 Channel DVR with Motion Detection 2.0

- Deep learning based Motion Detection 2.0 on all 16 channels
- 1080p lite @ 15 fps
- Maximum 18 IP camera inputs (up to 5 MP)

iDS-7204HQHI-M1/S

4 Channel DVR with AcuSense

- Deep learning based Motion Detection 2.0 on all 4 channels
- Up to 2-ch deep learning based perimeter protection
- 3K / 5 MP lite @ 12 fps, 1080p @ 15 fps
- Maximum 6 IP camera inputs (up to 6 MP)

iDS-7208HQHI-M1(2)/S

8 Channel DVR with AcuSense

- Deep learning based Motion Detection 2.0 on all 8 channels
- Up to 4-ch deep learning based perimeter protection
- 3K / 5 MP lite @ 12 fps, 1080p @ 15 fps
- Maximum 12 IP camera inputs (up to 6 MP)

iDS-7216HQHI-M1(2)/S

16 Channel DVR with AcuSense

- Deep learning based Motion Detection 2.0 on all 16 channels
- Up to 4-ch deep learning based perimeter protection
- 3K / 5 MP lite @ 12 fps, 1080p @ 15 fps
- Maximum 24 IP camera inputs (up to 8 MP)

iDS-7204HUHI-M1(2)/S

4-channel DVR with AcuSense

- Deep learning based Motion Detection 2.0 on all 4 channels
- Up to 4-ch deep learning based perimeter protection
- 8 MP @ 8 fps, 3K / 5 MP @ 12 fps
- Maximum 16 IP camera inputs (up to 8 MP)

iDS-7208HUHI-M1(2)/S

8-channel DVR with AcuSense

- Deep learning based Motion Detection 2.0 on all 8 channels
- Up to 4-ch deep learning based perimeter protection
- 8 MP @ 8 fps, 3K / 5 MP @ 12 fps
- Maximum 16 IP camera inputs (up to 8 MP)

iDS-7216HUHI-M2/S

16-channel DVR with AcuSense

- Deep learning based Motion Detection 2.0 on all 16 channels
- Up to 4-ch deep learning based perimeter protection
- 8 MP @ 8 fps, 3K / 5 MP @ 12 fps
- Maximum 32 IP camera inputs (up to 8 MP)

Note: Recording times are 2, 4, or 8 weeks by default parameters and in test environments, with all channels connected to analog cameras. Actual recording time might be under 2, 4, or 8 weeks in real-world scenarios, depending on environment, connected equipment, etc.
